AUSTRALIAN NOTICES TO MARINERS

Notices 38 - 87

Published fortnightly by the Australian Hydrographic Office

Australian Notices to Mariners are the authority for correcting charts and publications published by the Australian Hydrographic Office covering Australia, Papua New Guinea, Solomon Islands, Australian Antarctic Territory and Timor-Leste.

Commodore S.T. DUNNE RAN
Hydrographer of Australia

SECTIONS.

- I. **Australian Notices to Mariners, including blocks and notes.**
- II. **Hydrographic Reports.**

SUPPLEMENTS.

- I. **Tracings**
 - II. **Cumulative List of Australian Notices to Mariners.**
 - III. **Cumulative List of Temporary and Preliminary Australian Notices to Mariners.**
 - IV. **Temporary and Preliminary Notices in force.**

IMPORTANT NOTICE

This edition of Notices to Mariners includes all significant information affecting AHO products which the AHO has become aware of since the last edition. All reasonable efforts have been made to ensure the accuracy and completeness of the information, including third party information, on which these updates are based. The AHO regards third parties from which it receives information as reliable, however the AHO cannot verify all such information and errors may therefore exist. The AHO does not accept liability for errors in third party information.

GENERAL INSTRUCTIONS

The substance of these notices should be inserted on the charts affected.

Bearings are referred to the true compass and are reckoned clockwise from North; those relating to lights are given as seen by an observer from seaward.

Positions quoted in notices relate to WGS84 which is the horizontal datum for all charts produced by the Australian Hydrographic Office.

The range quoted for a light is its nominal range.

Depths are with reference to the chart datum of each chart. Heights are above mean high water springs or mean higher high water, as appropriate.

The capital letter (P) or (T) after the number of any notice denotes a preliminary or temporary notice respectively, which are contained separately at the end of the permanent notices.

REPORTING OF DANGERS

Mariners are particularly requested to notify the AUSTRALIAN HYDROGRAPHIC OFFICE, Locked Bag 8801 Wollongong, NSW 2500 (Fax 02-4223 6599, e-mail datapcentre@hydro.gov.au or, alternatively by filling in and submitting the [Hydrographic Notes](#) forms located on the web site – www.hydro.gov.au), immediately on the discovery of new dangers or suspected dangers to navigation. For changes or defects in aids to navigation notify AusSAR (Fax 02-6230 6868 or email rccaus@amsa.gov.au).

AUTHORISED USE

Copies of Australian notices are available free of charge from the Australian Hydrographic Office (AHO) website (www.hydro.gov.au) and through the eNotices (email) service (www.hydro.gov.au/enotices/enotices.htm).

Individual Notices may be copied for the purpose of inserting Notice substance on official charts and publications. Paper copies may be printed by chart agents and distributed to customers on a cost recovery basis. Participating chart agents are listed on the AHO website as providing a 'Paper Notices to Mariners' service (www.hydro.gov.au/webapps/jsp/agents/agents-list.jsp). Copies of the notices may not be sold for profit without prior written agreement.

Chart permanently withdrawn

Charts listed above as withdrawn no longer meet chart carriage requirements and should be marked as "superseded" and replaced with the new chart/ new edition listed prior to passage through the area covered by the new chart.

When placing orders with a chart agent between notice of forthcoming edition and its publication, mariners should advise whether their order pertains to the current edition or the new edition.

For further details refer to the AHO website at www.hydro.gov.au for new edition and new chart stock arrival information.

42 AUSTRALIA - Trial Implementation of Iridium SafetyCast Services
Australian Maritime Safety Authority

MARITIME SAFETY INFORMATION – ON TRIAL IMPLEMENTATION OF IRIDIUM SAFETYCAST SERVICES

The International Maritime Organization (IMO), International Hydrographic Organization (IHO) and World Meteorological Organization (WMO) announce the establishment of the Iridium SafetyCast Service, as a recognised mobile satellite service in the Global Maritime Distress and Safety System (GMDSS). Effective 11 December 2020, Iridium declared the Iridium SafetyCast Service operational for broadcasting navigational warnings, meteorological warnings and forecasts, and search and rescue (SAR) related information in the English language.

All distress alerting will be received by a Rescue Coordination Centre (RCC).

It is important to note the implementation process for NAVAREAs and METAREAs will be phased with the following status: planned, on trial, and operational. Please visit the IHO website (<https://iho.int/en/wwwnws>) for details on the implementation status of each NAVAREA and METAREA.

The Australian Bureau of Meteorology (as METAREA X) and Australian Maritime Safety Authority (as JRCC Australia and NAVAREA X) announce the commencement of the ‘on trial’ phase in Australia from 23 December 2020.

RCC Australia, NAVAREA X and METAREA X will provide SAR related information, navigational warnings, meteorological warnings and forecasts on an intermittent and test basis. The “on trial” period is a test and evaluation stage, which is necessary to ensure messages are processed and promulgated in a timely and appropriate manner.

Mariners are advised to check their manufacturer’s operation manuals to obtain information on the settings for their SafetyCast receivers.

Announcement of the ‘operational’ phase will come at a later date via the Iridium SafetyCast Service and the Australian Notices to Mariners. This includes implementation of distress alert services by JRCC Australia.

Further information on broadcast areas for navigational warnings, meteorological warnings and forecasts are available in the Mariner’s Handbook for Australian Waters (AHP20) published by the Australian Hydrographic Office (AHO).
